3. PoFi Tokenomics
4. Road Map

0 Introduction

Pollo is an advanced initiative that is built on Binance Smart Chain, and it allows the generation of sustainable basic income in the digital world. Pollo has been designed and built by Pollo Finance Team.

The protocols being launched by the Pollo Finance Team are as follows:

Protocol 1 – Pollo Swap (Inspiration: Pancake Swap, Goose Finance)
Protocol 2 – Pollo Basic Income (Inspiration: Basis Cash, bDollar, MIDAS Dollar)
Protocol 3 – Pollo Vaults (Inspiration: Yearn Finance, Auto Farm, bVaults)

It is an innovative solution that brings programmability and interoperability to the 3 protocols above.

There are expert economists on the team, and so it is equipped with a revenue sharing component which manages the protocols in a safe and consistent way. The plan is to apply an Audit to each protocol in order.

PoFi, the BSC token, is designed and built to act as a bridge for these 3 protocols.

Each protocol is designed so that it can leave the hands of the Pollo Finance Team and be managed by DAOs (Decentralized Autonomous Organization). The success or failure of this DAO is planned to be summarized and submitted in a paper in the Academy.

1 Why The Name 'Pollo' ?

We chose to name our team 'Pollo' because 'pollo' is the Spanish word for 'chicken' .

Why did we choose a chicken to be our mascot character?

Some of you who have read "Why did the chicken cross the world?" by Andrew Lawler may know that the history of mankind is intertwined with chickens.

Chickens have constantly laid eggs, offered us chicken meat and provided us with prosperity. Without the chicken, there wouldn' t have been any development in the human race. This circle of life is rich in important suggestions that can also be related to in the finance world.

Amongst the people who have started trading in cryptocurrency, there may be some who wish to live an easy life of leisure by making a big profit, and these desires are completely understandable.

It is true that in the cryptocurrency world, it is possible for people to make 50 or 100 times more in profits. It may have also been possible for someone to earn so much that they can relive their entire lives a few times if they had bought stocks in Apple or Amazon from a very early stage. The global market price is experiencing an ATH (All Time High) somewhere every day.

However, that is just like buying the Powerball every week and does not go beyond a gamble. It' s fine to throw yourself into this momentarily, but does it not seem silly to bet your own life just on this?

If Pump & Dump continued in the cryptocurrency world, all that will be left is a burnt field in the same way that there are no fish left in the pond if you fish them all.

If we look at Bitcoin and Ethereum, we can see that the people who had strong holds over what they have are the ones who have built their profits over a long period of time.

What we are providing is the chicken in the finance world. Our friends who continuously provide us with eggs and chicken meat brought long-term prosperity to us. These are the thoughts and designs that have gone into Pollo.

All you need to do is to continue living with chickens. They will continue to freely lay eggs for you.

2 The Future We Want To Realize

As COVID-19 has reminded us, the world is going through a turbulent period. Who could have imagined that going out outside itself could be a risk to ourselves?

Remote working has been promoted, but unfortunately, not all people have jobs that can be performed remotely.

Somewhere in the world, someone is travelling on a train, going into the office, railing electricity wires, delivering Amazon boxes, working at the checkout registers and cleaning the streets.

These people open their doors to leave their house even though they are consistently exposed to risks because they are fearful of losing their jobs as well. This could be you, or it could be a loved one of yours too.

What can we do for people like these? Politicians around the world are thinking about this, but we also have 1 suggestion. We think that what becomes true support in someone' s life is a brand-new type of finance that utilizes the most advanced technologies. In other words, a finance model that fulfills the short supply in pay and wages.

As Pollo' s first project, Pollo Swap will be started, and at the same time, PoFi, a utility token, will also be issued. PoFi may experience some violent fluctuations in the short term; however, in the hope that it will become a stable currency that can be accessed equally by anyone, it will be associated with Pollo Basic Income which is the 2nd project. In addition, PoFi will also play an active part in the Pollo Vault which is the 3rd project too.

There are excellent team members on the team to support the success of the projects. As mentioned earlier, there are expert economists taking part and a presentation about this initiative is being planned at the Academy.

All we are waiting for now is for the main lead to take the stage, and once they do, this project can start. Who is this main lead you ask? Of course, it is all of you, the ones who will participate in Pollo.

Please don' t forget that sovereignty continues to lie with you and let' s make a true DAO become a reality.

3 PoFi Tokenomics

Token

PoFi

Contract

- PoFi :0x461f6C9aE13a7daC7055C73fBF8daB529D667041
- Master Chef :0x4D2Fc26B10c59491A8332Bc0BF02F4f3834a4D09
- Time Lock :coming soon

Chain

Binance Smart Chain (BEP-20)

Emission Rate

- Reward Per Block: 0.5 PoFi
- Daily Emission (Based on 28.8k blocks /day) - 14.4k PoFi / day

Fees

(Deposit fees)
PoFi-BNB(cake-LP) / PoFi-BUSD(cake-LP) 0%
A flat-rate fee of 5% for all others

Breakdown of Fees

Farms

Buy Back & Burn 3%
Dev / Team Incentives 1.5%
Community Fund 0.5%

Pools

Referral Reward 5%
(If no referrals, it will be the same as Farms)

Time-Lock (To be implemented by March 30)

Team Pollo Finance will be adding a time-lock contract as the owner of the Master Chef.
The time-lock will be activated with a **24-hour delay**, and this should give you enough time to validate ANY of our transactions.

4 Road Map

The 3-Month Miracle that Pollo will Accomplish

Do you know bDollar and MIDAS Dollar? Was anyone just watching their success with a finger in their mouth?

Currently (March 2021), bDollar is 300 million dollars on TVL and MIDAS is about to hit 30 million dollars.

I'm sure that at first, most people didn't understand all the hype and enthusiasm around bDollar, and that by the time they actually understood how it worked, the price had bounced so much that many couldn't get in on it at that point.

However, don't worry, Pollo is only just starting on the 17th of March 2021.

What you're about to see next is the Roadmap to your dreams becoming a reality in the 3-month miracle!

Q1 January 2021

- **The Pollo Team formed!**
- **An official Twitter accounted started up!**

A project to make Basic Income a reality was established after many discussions with DeFi developers, cryptocurrency and economics experts/scholars and marketers.

Q2 March 17, 2021 at 12:00(UTC)

- **Pollo Swap will open!**
- **36,000PoFi will be sold on bounce.finance (1BNB = 50PoFi)**

There have been no prior sales for Pollo Swap, and no particular people will get special or favorable treatment. Every person starts equally and fairly at the same time, and anyone can realize these opportunities.

As you know, as time passes, the APR of Yield Farming tends to decline. Therefore, we recommend you gather as much PoFi as possible during these early stages.

Violent fluctuations in token price may be experienced, but it may be a great opportunity if PoFi is cheap. Why you ask? Because people participating in Pollo Swap can take part in Pollo Basic Income (seigniorage protocol) starting in Q2 with special conditions.

In addition, 60% of the 5% Deposit Fee will be used to Burn PoFi, so it can be expected that the price of PoFi will stabilize or rise. The cheaper that PoFi is, the more that can be Burnt.

If there is someone you love or care about, secretly tell them about this '3-month miracle' that is about to happen.

I'm sure that they will get to experience the miracle that will start with these 3 months, and they will be sure to be thankful to you for the rest of their lives. And from Pollo to you, the spreader of love and happiness, we will give back to you in the form of a referral bonus to add a bit of love and happiness into your life too.

Please see details about the referral bonus on the Telegram.

Q&A When should I start participating in Pollo?

You can participate at any time.

The only difference is that it's up to you whether you want to experience the miracle for the full 3 months or whether you just want to take part in it for the last month. I'd say that the people who know about this project right from the start are the happiest of all though! The people who are going to miss out the most are the ones who don't participate even though they are aware of Pollo's Roadmap.

- **In late March 2021, you can acquire PDO and sPDO through PoFi Pair!**

PDO (Pollo Dollar) is an algorithm stable coin, and it has the same properties / characteristics as bDollar's BDO. sPDO (share Pollo Dollar) is a token that gives you the right to receive PDO, and it has the same properties / characteristics as bDollar's sBDO.

Please see the following for the Farm Pool that is planned for launch:

Earn PDO by PoFi-BUSD
Earn PDO by PoFi-BNB
Earn PDO by BUSD (Deposit Fee 4%)
Earn PDO by BNB (Deposit Fee 4%)
Earn PDO by PoFi (HOT!!)

Earn sPDO by PDO-BUSD
Earn sPDO by sPDO-BUSD
Earn sPDO by PoFi-BUSD
Earn sPDO by PoFi-BNB
Earn sPDO by PoFi (HOT!!)

That isn't all though. We are currently planning to create a Pollo Basic Income whitelist listing all the people who own more than a certain amount of PoFi who will have the right to participate in Pollo Q2 (Pollo Basic Income) first. We will announce more about this when the time comes.

So what do you think? I hope you understand why it's important that you start to gather as much PoFi as early as possible.

Q2-2 April 2021

- **Pollo Basic Income will open!**

We have finally reached the implementation phase of Basic Income which has been the hopes and dreams of the Pollo Team.

Have you got enough sPDO reserved? Please ensure you receive the seigniorage benefits.

Once you gain enough profit to be able to support your everyday life, please start by reducing the amount you work.
Then, please face the things you've always wanted to do.
Maybe get involved in volunteer work in your community,
Or take an interest in poverty issues and disasters.
Watch movies all day from classics to trash.
Enjoy a better meal than what you're used to.
Gift your family and loved ones with presents.
Don't worry about tomorrow and do what you love all night whether that be gaming with friends or watching sports.

I think we all know that this is the best way to stay healthy!

- **Pollo Vaults will open!**

Are you enjoying the PDO that you're acquiring through Pollo Basic Income?

At the same time, I'm sure that there are some of you out there who don't even have the time to press the Claim Reward button each day. Or maybe some of you are looking for somewhere to leave it with a better interest rate.

This is where Pollo Vaults comes into play. Pollo Vaults will use your precious funds to gain compound interest automatically for you. All you need to do is to leave your LP there!

All that Pollo Vaults asks for in return is a very small amount in handling fees that are necessary for continuous operation.

In addition, while you leave your LPs in the Vaults, you'll gain Double Rewards on the following:

- PoFi
- PDO
- sPDO
- PVL
  and more

This is sure to be the most generous reward in the industry! It would be silly not to utilize it!

You, the ones who are able to gain this wonderful experience, should have secured enough sPDO through Pollo Basic Income through acquiring PoFi through Pollo Swap 3 months ago.

Congratulations!

Q3 Fall 2021

- **The organization of the DAO (Decentralized Autonomous Organization) will commence!**

What will happen to Pollo after the 3-Month miracle is over? This is actually where Pollo truly begins because Pollo aims to be a DAO.

The Pollo Team does not plan to continue being the managers and organizers of this forever. We wish for a future where it is independently managed by a decentralized community.

We hope for this because we put the profit of the people who participate in the Pollo community first and foremost. This is much more important than our own profits.

During this phase, the Pollo Team will be working hard to hand over everything to the DAO.

They say that old soldiers never die, they only fade away.

This is the final job of the Pollo Team.

- **All operational authority will be handed over to the DAO!**

Once the transition is complete, I'm sure that the community will utilize the new ideas and resources to draft, vote on and implement new projects and services for autonomous management and operation.

A leverage farm could be developed, or NFTs could be issued. Or maybe an offline volunteer team could be formed. Any of these ideas could work! Discussions around what Pollo needs and who Pollo is needed by will be had within the DAO I'm sure.

As stated in the Whitepaper, there is scholarly value in the full account of this transition to DAO. Once the economic expert / scholar in the Pollo Team has completed their paper, they will present it at the Academy, so please look forward to this.

I've said this many times before, but Pollo exists with you.

Are you still unsure even after seeing this Roadmap?

DeFi in the cryptocurrency world is specifically in the mouse year. I'm sure many of you are sick of hearing about the coin that was only worth $1 yesterday being worth $20 today, aren't you?

Pollo's activities will also leave great results in just a few months.

It's unfortunate that the number of people that the Pollo Team can reach is limited. When looking back overall, I'm sure that there will have been many more people who realize the existence of Pollo after the events are over.

In other words, if you're reading this Roadmap, you're one of the lucky ones.

There may come a time when you realize that not participating in it despite knowing about Pollo's activities was a huge mistake. Be aware of the risks of investing and don't forget about the DYOR mentality, but at the same time, don't miss your opportunity to ride that big wave either!

We will realize the happiness of you and the Pollo community.

The 3-Month Miracle
